

## CLINICAL SPOTLIGHT

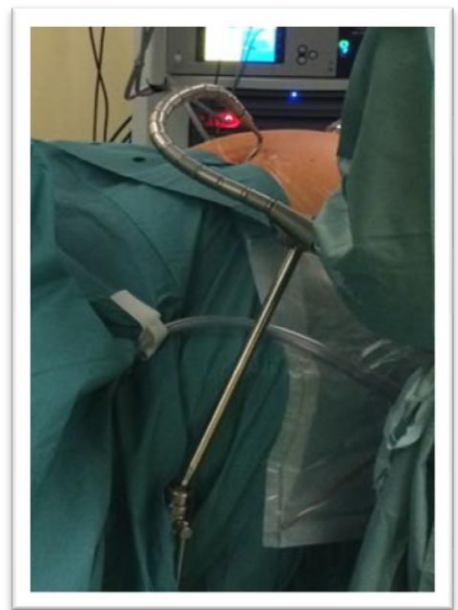

FlexArm Plus (99054-QC) and Robotic Nathanson Hook with 9cm shaft (69736-XL-R9) used in a Mini-Gastric Bypass / Omega Loop Bypass at Hospital of the Brothers of Mercy Hospital in Salzburg – performed by Chief Surgeon Dr. Jan Schirnhofner.

Simply declared by Dr. Schirnhofner and all involved: “Without the FlexArm Plus and the Robotic Nathanson Hook, this would have been too cumbersome to perform”.

**Another example of how Mediflex is REDIFINING RETRACTION!**

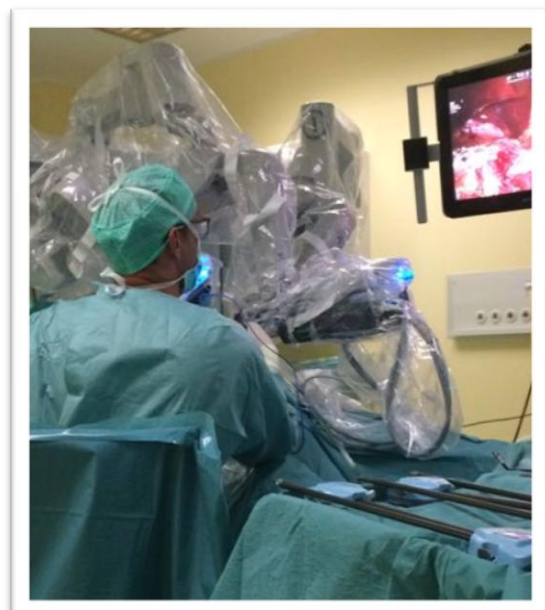

*FlexArm Plus adds to OR and procedure efficiency*

*FlexArm provides versatile, low-profile positioning – Robotic Nathanson Hook eliminates arm interference*

*Nathanson Hook provides efficient, atraumatic liver retraction*

*Surgeon operates without an assistant for liver retraction*
